

Methods are replicated by people; people are protected by systems.

Implementation organization · partner content management · staffing · automated operating system

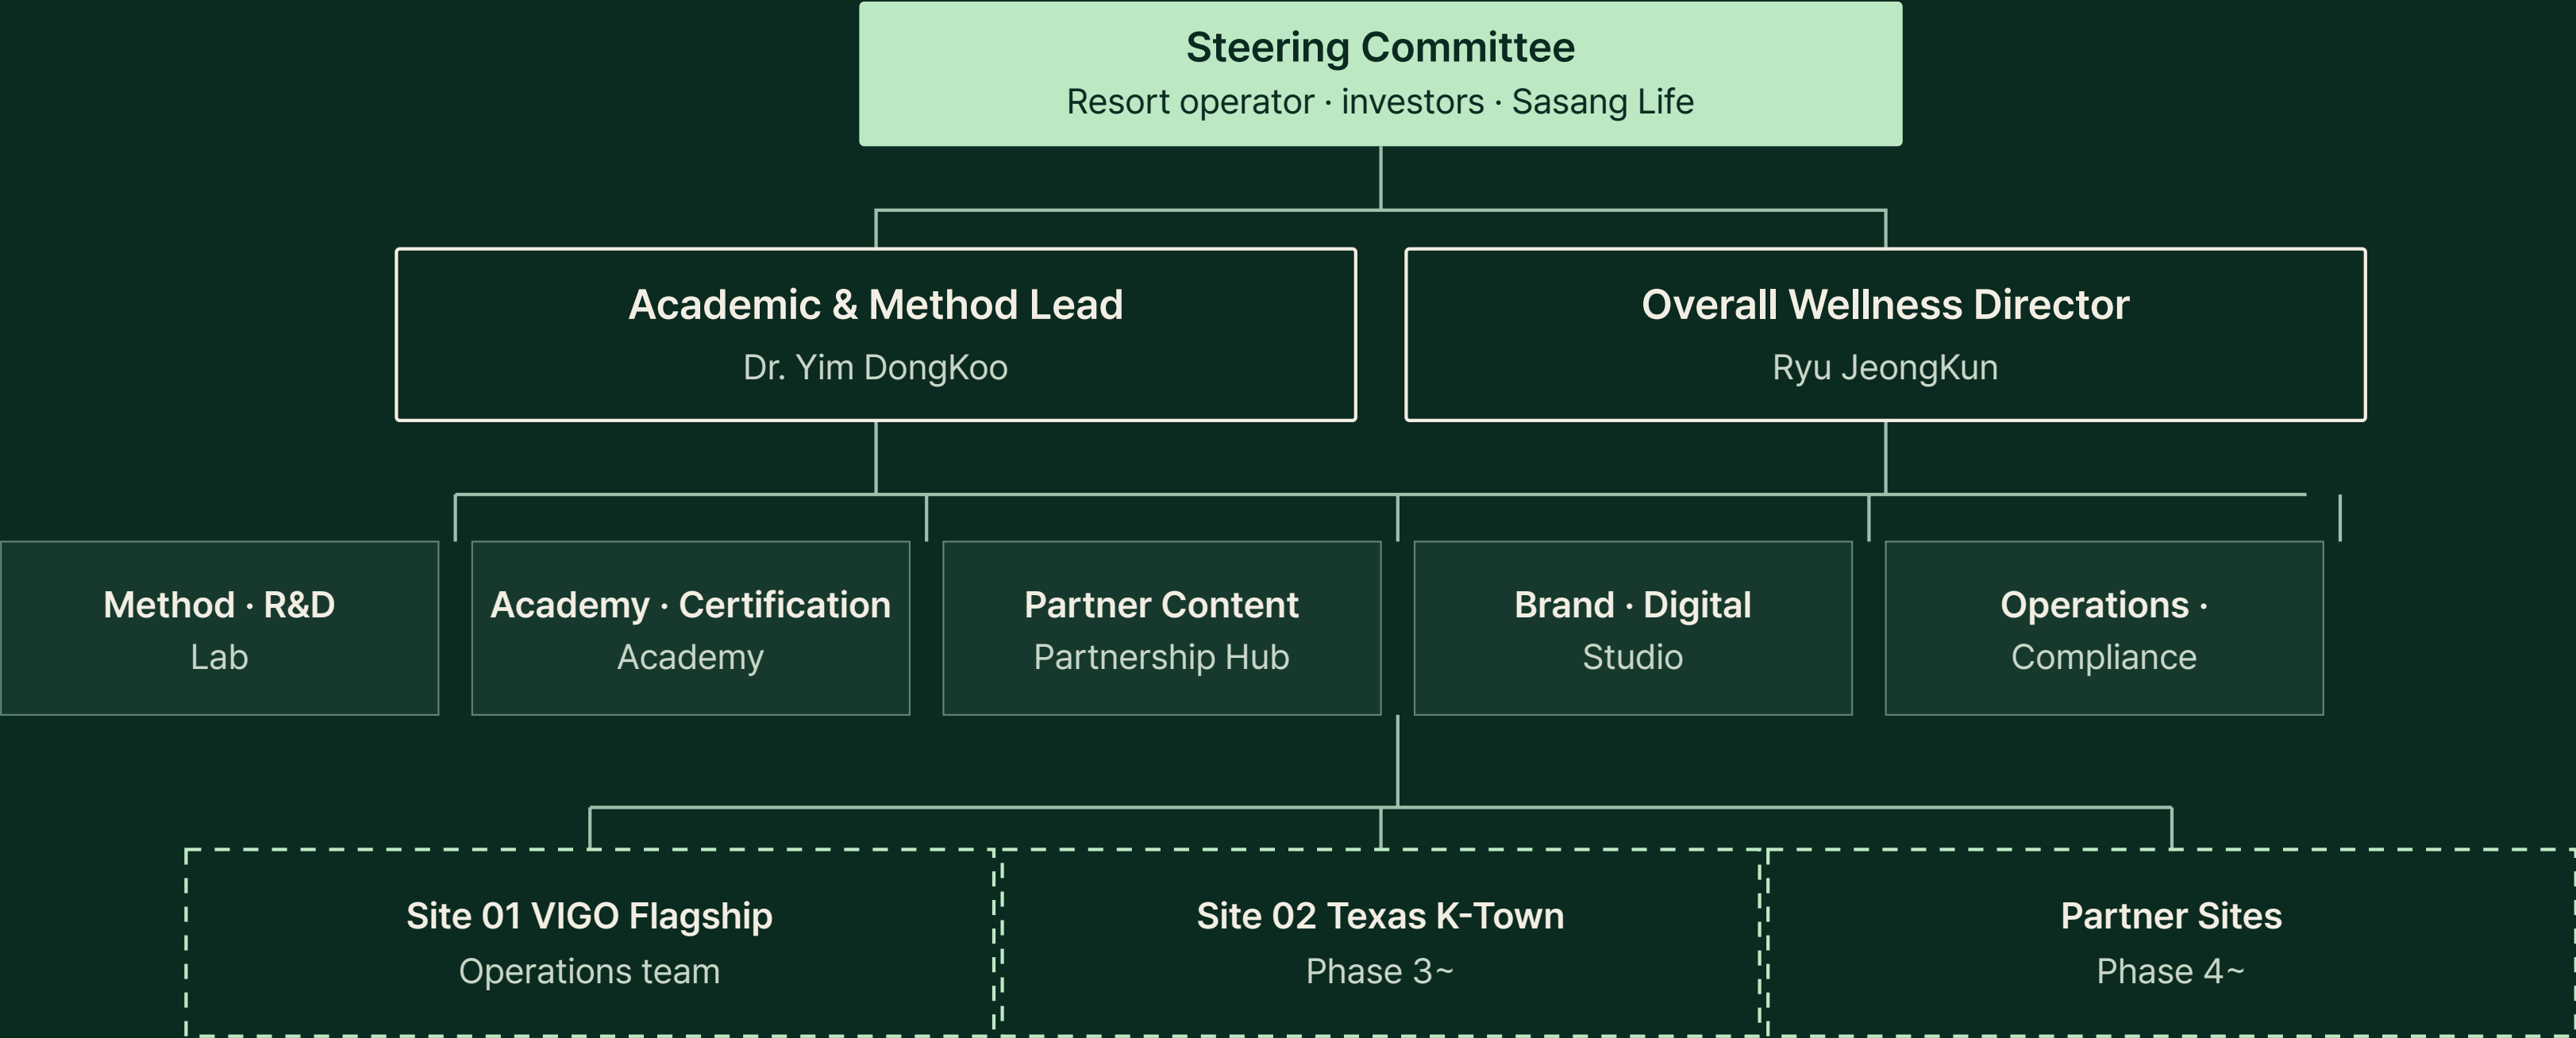

01 PRINCIPLES

Five design principles

I	A small head office, firm standards	Head office holds method, training, partners and data; site teams run operations
II	Education comes before opening	Training therapists and consultants is a precondition of Phase 0
III	Each site is a unit of replication	The VIGO team structure becomes the replication kit for Texas K-Town and partner properties
IV	Automate repeat work from day one	Systems handle assessment, reports, notices, subscriptions and settlement; people focus on consultation and care
V	Claims and safety managed in one place	Compliance reviews claims, safety rules and personal data across every channel

Content

Every health-related message sent to guests is checked by a person last.

DATA Constitution and health data treated as sensitive, with separate consent · consultation data stored privately in-house · genetic and microbiome tests optional, under the lab's consent process

06 FIRST 90 DAYS

Phase 0 — 13 weeks

Task / week	1	2	3	4	5	6	7	8	9	10	11	12	13
1-2 weeks Organization · key leads · partner map	Organization												
3-6 weeks Method standards v1 · 10 SOPs · claims and safety guide · system phase one			Standards · build										
7-10 weeks First therapist cohort · constitution menu · partner pilot							Training · pilot						
11-13 weeks Rehearsal stays · automation check · opening-readiness report											Rehearsal · report		

Four decisions for the next meeting

☐ Legal form of the implementation organization and its relationship to the resort operator

☐ Participation tier for each content partner

☐ Phase-one system budget and who builds it

☐ Timing of staff deployment to match the Texas schedule
